DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see page 3-24, filed 4/22/05, with respect to claims 1-35 have been fully considered and are persuasive. The final rejection of 10/28/04 has been withdrawn.

Allowable Subject Matter

- 2. Claims 1-35 are allowed.
- 3. The following is an examiner's statement of reasons for allowance: Prior art fails to show a electroactive device having at least two layers of material, each layer having length, width, and thickness dimension wherein the thickness of each non-uniform layer thickness layer varies along one of more of the non-uniform thickness layer's length and width. Prior art also fails to show, the non-uniform layer's thickness of at least one layer is a function of both the length and width of each layer; a non-uniform layer having at least one layer of electroactive material that is an electrosactive graft elastomer comprising a backbone molecule which is a non-crystallizable, flexible macromolecular polar graft moietics having been rotated by an applied electric field and sustained in the rotated state until the electric field is removed and a electroactive device having at least two layers of material each layer having a length, width and a thickness dimension wherein the cross section of at least one non-uniform layer is defined by a function of both the distance along the length of the layer and the distance along the width of the layer.
